HTML, CSS and SCSS, Javascript, Node.js, Express, MongoDB, WordPress, Git, Github, Figma, Photoshop.

▶ PROJECTS

FULL STACK DEVELOPER - LOST PETS

Dec 2021 - Feb 2022.
Designed and created an app to search lost and found pets, includes user and post creations, an interactive map, filters by race, date and distance among others.
Developed the front-end with HTML, vanilla Javascript, CSS and Bootstrap.
Back-end composed of API with RESTful standards, NodeJs with express, MongoDB, using Google MAPS and facebook API for the map and login respectively, and Cloudinary as image hosting service.
